Personal Assistance for Seniors Who are Self-Reliant

ASSIGNMENT-4

Date	02 November 2022
Team ID	PNT2022TMID39645
Name	Gunasekaran
Student Roll Number	510619106004
Maximum Marks	2 Marks

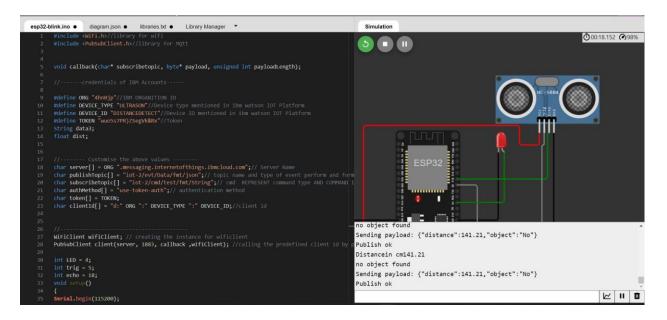

Problem Statement:

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cm send "alert" to IBM cloud and display in device recent events.

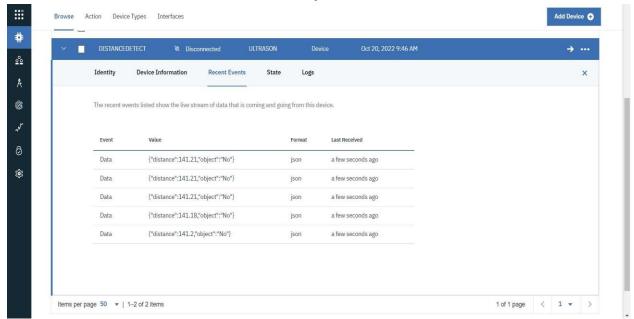

CODE:

```
esp32-blink.ino
                   diagram.json •
                                    libraries.txt •
                                                    Library Manager
          WiFi.begin("Wokwi-GUEST", "", 6);//passing the wifi credentials to establish the connection
          while (WiFi.status() != WL_CONNECTED) {
           delay(500);
           Serial.print(".");
         Serial.println("");
Serial.println("WiFi connected");
          Serial.println("IP address: ");
         Serial.println(WiFi.localIP());
       void initManagedDevice() {
         if (client.subscribe(subscribetopic)) {
           Serial.println((subscribetopic));
           Serial.println("subscribe to cmd OK");
          } else {
           Serial.println("subscribe to cmd FAILED");
       void callback(char* subscribetopic, byte* payload, unsigned int payloadLength)
          Serial.print("callback invoked for topic: ");
 148
          Serial.println(subscribetopic);
          for (int i = 0; i < payloadLength; i++) {</pre>
           data3 += (char)payload[i];
```

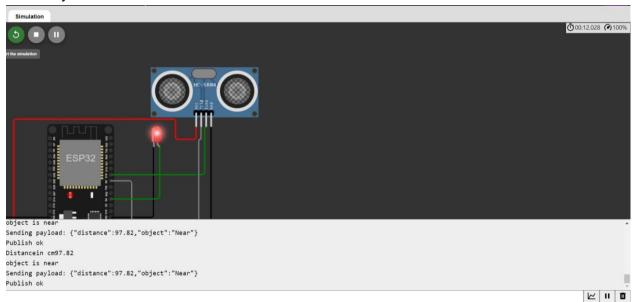

OUTPUT:

Data send to the IBM cloud device when the object is far

when object is near to the ultrasonic sensor

Data sent to the IBM Cloud Device when the object is near
